I'm a Developer, Designer and Open-Source enthusiast currently employed at UsefulBi Corporation in India. As a Frontend Developer with **2+ years of experience**, I shape UI for flagship products. Seeking a vibrant, innovative development environment for continuous learning and impactful contributions.

## EXPERIENCE

### USEFULBI CORPORATION FRONTEND DEVELOPER (JAN 2023 -- PRESENT)

Jan 2023 -- Present | REMOTE/Bengaluru, Karnataka

**Project 3:** A Gen-AI based **NextJS** based tool for medical diagnosis

- Developed several reusable components in **Typescript**.
- Collaborated with the backend team to **design APIs** for the seamless integration into the UI.

**Project 2:** A **ReactJS** based adaptable data pipeline automation tool infused with AI

- Prepared mock-ups and wireframes to collaborate with the UX designer to frame the desired UI in **Figma**.
- Collaborated with the backend team to **design APIs** for the seamless integration into the Frontend.
- Developed several components in **React**, **Ant Design Components** and **Tailwind CSS**, including integration of **Azure SSO** for user sign-in and registration.
- Worked with the **DevOps** team to deploy the app using **CI/CD** and wrote test cases in **Jest** for the React code.

**Project 1:** A comprehensive platform that streamlines site selection and project management in clinical trials, enabling effective evaluation of scenarios and optimal decision-making

- Developed reusable components using **React**, **Ag-Grid Tables** and **Material UI**.

DATA ENGINEER (MARCH 2023 -- OCTOBER 2023)

- Worked with a major PC manufacturing client on multiple **Data Migration** projects from **EDL to Azure Cloud**, dealing with moving their Customer Service Application database.

### ACCENTURE APPLICATION DEVELOPMENT ANALYST
